OECD Trade With Mexico and Central America

Preface

This publication is the third in a series of reference aids that will provide the most recent detailed commodity statistics of OECD 1 trade with different regions of the world. In this Reference Aid, data are provided on total OECD trade with Mexico and Central America, trade of the five largest OECD countries with the region, and US trade with Mexico and selected Central American countries. We plan to update the reference aids annually because of the interest in the LDC debt problem and interregional trade patterns.

¹ For tabulation purposes, the Organization for Economic Cooperation and Development as here defined excludes Iceland, New Zealand, Portugal, and Turkey.
